When it comes to predictability, JW Black is a herd sire that we have relied upon for years to assist us in doing our part in moving the needle forward for the breed when it comes to a desirable phenotype. We have recently utilized his direct son and the 2009 Reserve National Champion Simbrah Bull LMC ATZ Dr. Feel Good extensively in our

embryo program as we feel that JW Black's influence still adds value to any pedigree. We are anxiously awaiting these JW Black grand daughters and sons coming this season.

As JW Black semen has become rare, it has only been marketed a unit at a time and each buyer has had success with their purchase. Recently, the Petrus Family selected JW Black as their go to sire to mate their many times major champion Cricket female. JW Black sired a sale topper for Triple C Cattle Company that went on to be a champion for Emily Denny and is now a donor for Marshall Curl. Baring recently produced a gorgeous LMC MT Transformer daughter out of their champion JW Black daughter. Finally, Hagan Cattle Company has raised numerous champions including a National Champion Female and International Champion Bull with their JW Black purchase, not to mention what all JW Black granddaughters have done for them as well.

JW Black is the sire to the likes of BBS Jennie Walker, LMC Miss Diva (LMC WFC Ms. Dream Girl's dam), LMC HS Rocco and several other breed greats making big things happen to this day. Through the utilization of embryo transplant, you have the potential to aspirate numerous donors with this straw and produce your own JW Black home runs. No bull has done what JW Black did for us in terms of modernizing our cattle by making front 1/3's more appealing, maintaining the capacity and flattening hips as well as cleaning underlines with the muscle we need to continue to provide stockman with functional cattle.

Semen is stored at Bovine Elite in College Station, Texas and buyer is responsible for shipping costs.
