Location: Transova - Maryland

Consigned By: J&T Farms

[Click Here to View Mating's Pedigree & EPD'S](#)

From a new age elite herd sire to a legendary donor within her own right, this unique embryo offering presents an extremely exciting opportunity. Back in 2010, J&T Farm acquired the original Wicked Witch for a stunning \$40,000, because of the genetic value she offered. After years of invaluable production and inevitable old age, Jerry and Tammy made the investment in cloning Wicked Witch. This embryo lot places one of the resulting donor clones with the hottest new bull in the breed, JT Daybreak. To make it even better, J&T utilized the reverse sorting technology to ensure that these embryos would result in female progeny. Imagine the red, POLLED heifer that will result from this mating and will be boasting PE EPDs like a 109 \$T and 27 \$M index.

Quantity: 4
