Hands down, the highest value creating sire in 2023 for the Collier Farms program and probably the entire breed was WB Solution. From a \$100,000 daughter to \$70,000 son

and many more well above the \$50,000 mark, the potential to create extreme value is proven. With the available technologies today to take one straw and produce countless calves from a number of donors, wise breeders will recognize the opportunity and value presented here. Solution provides the cow families you demand, the performance numbers needed, and the progeny marketability that will take your program into profitability. Solution semen is rare, so don't pass this by. Top 20% \$T and Top 2% \$M.

Semen sells with 5 Certificates

**Quantity: 1**
