The only thing better than putting a great herd sire in a mating is combining two great herd sires in the same embryo mating! This exquisite lot places Daybreak back over the full sibling of Lyssy's Custom Made. Goodwin Beefmasters produced the Pure Essence donor via a wise embryo acquisition from Lyssy. Within a quick minute, this young donor was ready to show the world her stuff and Goodwin was wise to oblige. The combination of Daybreak and Pure Essence provides the buyer with a strong shot at both a homozygous polled animal and chart topping EPD performance. As both parents are polled for multiple generations, one understands that this trait will be extremely dominant. In addition, the PE EPD's place the resulting embryo progeny in the top 1% for \$T with a whopping 150 value and \$M in the top 3% with a 31. If that were not enough, consider the Pure Pleasure and Magical Pearl cow families lining the bottom of the pedigree tree for added consistency!
