Description

2A: JT Daybreak x 3B 23-31

2B: JT Daybreak x 3B 24-1

One of the most exciting attributes about Daybreak is his ability to produce heifer safe, low birth weight calves with explosive growth and unmatched conformational quality. This phenomenal pick of AI heifer calves represents the first natural progeny of their exciting dams. These massive made, heavy weaning heifers are the product of two first calf heifers raising these beauties in the dry, harsh brush country of south Texas. At only a little over 10 months of age, these girls were well over 900 pounds each and nearing the 4 digit mark. Within a quick click of the breed registry link, one will find an amazing EPD profile and a legendary list of some of the most sought after genetics in the breed. From mainstays like Fusion, Troubador, and Dream Catcher, to new power bulls like CF Gulf Stream, this pick of heifers have the performance and pedigrees you want from which to select your next cornerstone donor. As expected, Triple B is only letting one of these leading ladies go, so don't let another breeding season slip by without adding Daybreak to your program.

Quantity: 1
